

PROTECT your VEHICLES and MACHINERY

The Bitron (By Tron) Treatments are "metal treatments" and are 100% Petroleum based. There are " NO ADDITIVES " in the Bitron Treatments which are ADDED to :-- fuels; engine crankcase oils; all types of transmissions; gearboxes; compressors and hydraulics.; in fact anywhere OIL is used for lubrication.

As an engineer, I have gained the knowledge of 20 years experience promoting the Bitron Treatments with great success, gaining "maintenance reduction and fuel savings" for more than 300 of my regular Bitron commercial customers, I know just what these Bitron Treatments can do for YOU and your friends.

Any of my Bitron customers who have been adding the 3 main Bitron Treatments to their machinery for 10 years or more; ALL tell me, that, since they have been adding the Bitron to their machinery they have NOT had any "down time" from mechanical breakages. In fact, they added, that they have not needed to put a spanner on their machinery for maintenance in that time. This time and labour cost saving, would be far more valuable to a farmer or machinery operator, than saving fuel. Operators cannot afford to have "down time" during harvest, or heavy work load periods.

What happens is:- individually, the Engine and gearboxes vibrate in different ways. Metal parts wear quickly and at times break. The **ADDING** of the Bitron Treatments to **both** the Engines and the Gearboxes smooths out the friction in both areas and the machinery operates as one unit. The harmonics blend together and all operate smoothly.

These comments are given to me from hundreds of vehicle and machinery operators, which in turn gives me the confidence to talk to you about these amazing BITRON Treatments, and being able to make the following statement:--

BITRON (By Tron) Statement:--

MONEY cannot buy the INSURANCE you can get from ADDING the BITRON Treatments to your Vehicles and Machinery.

Mechanical RELIABILITY comes with ADDING the BITRON Treatments.

FUEL ECONOMY comes from ADDING BITRON.

EXHAUST Pollution EMISSIONS can be REDUCED by about 90%.
